

# 144 Optical Distribution Box

## Overview

Our fast deployment fiber distribution cabinets can accommodate multiple fiber capacities that include 144, 288, 432 and 576. They enable you to deploy fiber count capacities of 144 or more in the field quickly using pre-terminated CT-X cassette. Our fast deployment fiber distribution cabinets can accommodate multiple fiber capacities that include 144, 288, 432 and 576. They enable you to deploy fiber count capacities of 144 or more in the field quickly using pre-terminated CT-X cassettes and optical splitters. Over the years, the switch to fiber optic cables has greatly increased the speed of networks for telecommunications services subscribers. Due to their higher cost, however, fiber optics have also increased the need for efficient, cost-effective cable distribution. To save money while bringing fiber optic networks to more customers, engineers rely on fiber distribution hubs to manage fibers within your network, you need to find cabinets that meet your specifications and make your job easier. At Multilink, we produce fiber distribution hubs for use in a variety of applications. When you browse Multilink's product selection, you'll get to choose between two FDH cabinets that utilize. As the most adaptable fiber cabinet that we offer, the Hybrid Splice

Hub™ features 144, 288 and 576 fiber count termination options with LC or SC connectors. It has a flexible design that you can configure to meet almost any network design requirement. Our customers use the Hybrid Splice Hub™ in diverse applications for residential and commercial e. All of our Splice Hub™ fiber distribution hubs have these additional features: 1. Adjustable cable management ears for streamlined organization 2. "Parking lot" for detached fiber lines 3. Integrated grounding bar that protects equipment from high voltages 4. Re-enterable base for accessing the fiber cable before entering it into the cabinet.
