

1x9 100m optical module

1x9 100m optical module

Link-PP 1X9 Optical Transceiver solutions enable high-speed, low power, and high-density connectivity. Ideal for a variety of applications including data centers, enterprises and high-performance computer ...

Shop DigiKey's large in-stock selection of Fiber Optic Transceiver Modules. View inventory, pricing and order now for same day shipping!

The 1x9 optical transceiver is designed for use in 0~1.25Gbps data links and up to 20km distance and provides the SC/FC/ST optical port that is compatible with the industry standard connector.

All Rights Reserved.

Select the best 1x9 optical transceiver by matching fiber type, distance, speed, and connector for reliable network performance.

Since its establishment in 1999, Hi-Optel has been specialized in developing, manufacturing and marketing modules for fiber optical communication fields.

1x9 transceivers are the earliest and oldest-style optical modules. Initially created in the 1990s, they aimed at 100M/1G Ethernet, Fibre Channel, ATM, FDDI, SDH/SONET, and video applications. Then, ...

1x9 optical module applications include industrial automation, telecom backhaul, and legacy network upgrades for reliable, cost-effective data links.

The 1x9 form factor dates back to the 1990s. It was originally designed for OC-3 and 100Mb Ethernet optical transceivers. The technology evolved to early generations of 1Gb/s Ethernet, 1Gb/s Fibre ...

Explore our range of 1x9 transceivers designed for single-mode and multi-mode fiber applications. Supporting data rates from 155Mbps to 1.25Gbps and available in CWDM configurations, these ...
