

5730 Switch Optical Port

Overview

The S5730-SI provides one slot for ES5D21Q04Q01 (4-port 40GE QSFP+ rear interface card) for upstream connections or ES5D21VST000 (dedicated stack card with two QSFP+ ports) for stack connection. To restore the factory settings and reset the switch, hold down the button for at least 6 seconds. The S5730-SI series switches are next-generation standard gigabit Layer 3 Ethernet switches. The SW5730-48S6S switch is a high-performance 10G fiber switch developed by our company. This switch supports up to 48*1G/10G SFP+ ports, along with 6*40GE/100GE QSFP28 uplink ports. Its primary value proposition lies touch provisioning (ZTP). The switches are developed based on Huawei Versatile Routing Platform (VRP to implement software de to s the entire network into one device. The d, they stretc d, they stretch. Huawei S5730-HI gigabit Ethernet switches (hereinafter referred to as the S5730-HI) are Huawei-developed next-generation agile switches that provide fixed full gigabit access and 10GE uplink interfaces as well as one or two slots for uplink interface extension.

5730 Switch Optical Port

They can be used as an access or aggregation switch on a campus network or as an access switch in a data center. The S5730-SI series switches provide flexible full gigabit access and cost-effective fixed ...
