

800G Optical Module Housing Product

800G Optical Module Housing Product

Discover everything about 800G optical modules—standards, packaging, types & applications. Learn how they power AI, HPC & next-gen data centers.

Over 50% of our products are exported to Europe, the U. S., Russia, and global markets. We strictly adhere to ISO standards and implement full-process quality control to guarantee accuracy and ...

It is compliant with IEEE 802.3 800GBASE-VR8 and OSFP MSA module requirements with integrated heat sink. Optical signals are carried over eight pairs of parallel lanes, with one ...

The high bandwidth module supports dual 400G Ethernet connections, octal 100G Ethernet connections, or a single 800G Ethernet connection over parallel single-mode fiber links up to 2 km.

This high-precision die-cast housing is specifically designed for QSFP-DD (Quad Small Form-factor Pluggable - Double Density) optical transceivers. Engineered to meet the rigorous demands of next ...

Explore the critical challenges of optical module housings in the 400G/800G era: heat management, material limits, signal integrity, and how innovation tackles them.

The OSFP Housing encompasses the physical and mechanical features that house the optical and electrical components of a OSFP module. Its design is standardized to promote interoperability and ...

Amphenol's 800G OSFP optical modules include 2xDR4 (plus), 2xFR4 (plus), 2xLR4, AOC, and AOC breakout series, which adopt LC or MPO optical ports and are compatible with ...

This product is widely used in scenarios such as Ethernet networks, data centers, and cloud networks, serving as a core component for building 800G high-speed optical networks.

Lumentum's 800G 2xDR4 OSFP transceiver provides high-speed, energy-efficient optical connectivity for AI and cloud data centers. Each module integrates eight electrical and eight optical channels ...
