Across ASEAN - this buzzing economic powerhouse of 650 million people - we're facing an energy revolution. And it's these unassuming metal boxes that hold the key to powering our future. Here's the deal: ASEAN's lightning-fast growth means we're adding new buildings, factories, and infrastructure. The Electrical Appliances (Color Code) Regulations 1969 came into effect on 1 July 1969. This included four major color codes for industry as well as for domestic purposes:- Brown for live -. In the United States, standard wiring color codes for electrical installations are defined by the National Electrical Code (NEC). The following color codes apply to different AC and DC power systems: In some wiring systems, one phase has a higher voltage than the others, known

as the high-leg. These standards provide guidelines for identifying the different wires used in various electrical systems.
