

After-sales service for earthquake-resistant server racks with immersion liquid cooling

Overview

We're leading the pack, with direct-to-chip immersion-cooled server systems that quickly integrate into existing racks and provide an entirely new level of performance. See how Port d'Informacio Cientifica (PIC). Our comprehensive service includes precise in-rack cabling, initial hardware configuration, and thorough power-on health validation testing to ensure optimal performance from day one. Maintech, working closely with OEMs and ODMs, has successfully deployed large scale Hyperscale Data Centers around the world. The Liebert VIC liquid cooling solution is specially designed for high-heat servers in data centers. It uses insulating coolant as the carrier refrigerant to directly cool the servers. LiquidCool Solutions is the only company combining Total Liquid Immersion with Directed Flow (direct-to-chip) in a standard 19" rack. Together, these systems create a broad CDU portfolio spanning from 600 kW up to 2.6 MW, enabling operators to match performance, redundancy, and investment level to the needs of each.

After-sales service for earthquake-resistant server racks with immersion

One scheduled preventive maintenance service visit and a comprehensive visual, environmental and operational inspection of the system confirms components are performing to specifications.

The Liebert VIC liquid cooling solution is specially designed for high-heat servers in data centers. It uses insulating coolant as the carrier refrigerant to directly cool the servers.

Aeons Technologies offers server racks, cabinets, cable management and cooling solutions for data centers, cloud, and industrial environments, enabling efficient, future-ready IT operations. When it ...

Meet soaring compute demands efficiently with LiquidCool Solutions' versatile, immersion cooling for high-performance GPU dense servers. Perfect for data centers, AI, edge computing, and tough ...

Our comprehensive service includes precise in-rack cabling, initial hardware configuration, and thorough power-on health validation testing to ensure optimal performance from day one.

Supermicro is an end-to-end solution provider for rack scale liquid cooling solutions. Supermicro's delivers a complete and fully tested solution, including servers, racks, networking and liquid cooling ...

The rack has been rigorously tested to support loads up to 550 kilograms under Zone 4 conditions + over 30 years experience making earthquake resistant server rack we provide for our World Class ...

Working directly with the world's top semiconductor, server and hyperscale technology companies, CoolIT designs and mass-produces highly optimized liquid cooling solutions.

Experience next-generation immersion cooling solutions from GRC. Our solutions increase performance, enhance sustainability and optimize TCO, setting new standards of data center cooling efficiency.

DCX's Immersion Modular Datacenter immerses servers in a dielectric fluid, delivering direct heat absorption and drastically reducing cooling overhead. This fully sealed, compact solution is easy to ...
