Overview

Funded by the European Union, Germany and the Municipality of Tirana, this project aims at developing, implementing and operating Tirana's first electric Bus Rapid Transport system, known as “e-BRT”, on three of the main transport corridors in Tirana: Unaza, Tirana e Re and. Funded by the European Union, Germany and the Municipality of Tirana, this project aims at developing, implementing and operating Tirana's first electric Bus Rapid Transport system, known as “e-BRT”, on three of the main transport corridors in Tirana: Unaza, Tirana e Re and. Mobility in Albanian cities faces increasing pressures from rapid motorization and its effects on air quality, road safety, and quality of life. The number of vehicles continues to rise, contributing to severe congestion, greenhouse gas emissions, and air pollution. Public transport systems in and. 1) Speed — up to 500 km per hour 2) Capacity of rolling stock: freight — up to 100 tons. 3) Declivity (downward slope) — up to 10%, at special design — up to 30%. 6). Tirana, March 6, 2024 - The Green Transport Tirana project was presented today, marking a significant step towards modernizing public

transport in the Albanian capital. 2 million from the city budget.

Albania door-to-door transportation high-speed photoelectric connection

Part of the EU Economic and Investment Plan, the project benefits from a substantial package of grants, loans and technical assistance. The project will promote the modal shift to rail, ...

The endeavor was launched to provide a long-term environmentally friendly and sustainable solution that would be more affordable than other high-capacity public transport systems.

It will be launched initially on three of the main transport lines in Tirana: Unaza (Ring), New Tirana and Kombinat-Kinostudio.

7) The cost of high-speed transportation is five times lower for passengers than transportation by existing high-speed railway, magnetic cushion trains and aircrafts.

The successful completion of this project will not only modernize Albania's railways but also enhance cross-border cooperation, making the region more economically integrated and ...

Below is a compact overview of the most important upcoming transportation projects in Albania. Later sections go into more detail about what each project means in practice.

The project aims to transform Albania's urban mobility landscape by fostering institutional capacity, digital innovation, and sustainable transport investments.

Through this paper we'll try to provide an analyse of the total demand for freight and passenger transport as well as the possibilities of developing rail transport by comparing it with road...

Funded by the European Union, Germany and the Municipality of Tirana, this project aims at developing, implementing and operating Tirana's first electric Bus Rapid Transport system, known ...

The smart tachograph was introduced in the European Union on 15 June 2019. It is a new instrument for member States. In Albania, the smart tachograph is used in the national fleet, but no regulatory and ...
