

Are cheap optoelectronic converters usable

Overview

Intense development has made integrated photonics cheap, at least relative to the complexities of all-optical wavelength conversion. Although OEO wavelength converters require a receiver and laser transmitter, the electronics are straightforward to build at 10 Gbit/s. Versatile optical communications R&D instrument. The O2E is available in compact MATRIQ™. I'm trying to gather some info about cheap coaxial to optical S/PDIF converters -the cheapest ones people seem to discuss here are around \$40 (and they are 2 way ones). O/E (Optical to Electrical) conversion is a process that involves converting optical signals into electrical signals. In this explanation, we will explore.
