

Automatic Optical Fiber Switching Equipment

Automatic Optical Fiber Switching Equipment

If something such as an action or a punishment is automatic, it happens without people needing to think about it because it is the result of a fixed rule or method.

AUTOMATIC definition: 1. An automatic machine or device is able to operate independently of human control: 2. An.... [Learn more.](#)

Boost uptime & cut costs with XENOptics zero-touch fiber switching: sub-minute reconfigurations, API/NMS control and polarity-safe links for modern multi-floor data centers.

Something that's automatic is done without thinking, almost as if you're a well-programmed machine. The word automatic can be used to describe a machine that works on its own, performing its tasks ...

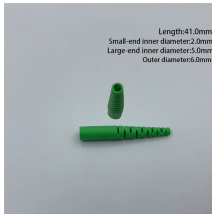

Adjective automatic (comparative more automatic, superlative most automatic) (superlative dubious) Capable of operating without external control or intervention.

I can't drive her car because it has a manual transmission instead of an automatic transmission. [=a system that changes gears at different speeds without direct control by the driver]

Acting or operating in a manner essentially independent of external influence or control: an automatic light switch; a budget deficit that triggered automatic spending cuts.

Make simple and effective fiber network management possible at the physical connection layer. These rack-mounted patching systems use robotic latching and remote management to establish fiber ...

An automatic machine or device is one that has controls that enable it to perform a task without needing to be constantly operated by a person. Automatic methods and processes involve the use of such ...

The unit offers three types of switching 1x2, 2x1, or 2x2. The remote switching ability is very useful for managed systems. A front panel LCD provides system status and provides a means of programming ...

Bring software-controlled optical circuit switching into your network to maximise uptime and performance. The POLATIS range combines decades of expertise with the latest technological ...

XENOptics automatic fiber switching lets telecom operators reroute traffic in seconds with remote NMS control, automatic failover and OPEX-cutting, truck-roll-free upkeep.

Comlan CL-FOS Optical switch switches between fibre optics signals if one of them fails. In Auto mode switch constantly monitors inputs optical power and when optical power drops on one of the input, it ...

The MPO-24 optical fiber switch allows users to verify some or all fibers in a multi-fiber connector in a single test, saving both time and money by automating the scanning process without the need to ...

It can be switched automatically using an optical switch. By using optical switches for equipment redundancy and transmission line redundancy, it is possible to significantly reduce network ...

AUTOMATIC meaning: 1. An automatic machine or device is able to operate independently of human control: 2. An.... [Learn more.](#)

Our factory supplies various state-of-the-art fiber optic switches for sale, meeting the highest standards in the industry. Whether you're in need of optical switches for transmission systems, testing setups, ...

spontaneous, impulsive, instinctive, automatic, mechanical mean acting or activated without deliberation. spontaneous implies lack of prompting and connotes naturalness.

The fastest, smallest, most reliable optical switches in the industry. Used in medical devices, undersea cables, quantum computers, underground and outer space.

AUTOMATIC definition: having the capability of starting, operating, moving, etc., independently. See examples of automatic used in a sentence.
