

Cable tray CCCF certification

Overview

This standard specifies the requirements for nonmetallic cable trays and associated fittings designed for use in accordance with the rules of the Canadian Electrical Code (CEC) Part 1, and the National Electrical Code® (NEC). The Cable Tray Institute (CTI) was founded in 1991 to support the cable tray industry by engaging in research, development, education, and the dissemination of information designed to promote, enhance, and increase the visibility of the industry. As an industry leader in cable tray, Eaton offers one of the widest ranges of B-Line series cable management. Provides technical requirements concerning the construction, testing, and performance of metal cable tray systems. It is the first joint effort of NEMA and CSA International to put in one place standards for metal trays per both NEMA and CSA methods. 336, 392 and 501 of NFPA 70 (NEC) and Table 19 of CSA C22. Thanks to the new approvals and the.
