

Cable tray lifespan in Costa Rica

Overview

Lifespan (1-2 years to 10 years): Regular galvanized steel trays have a thinner protective coating and are often exposed to corrosion in humid or corrosive environments. In highly corrosive environments, such as coastal or industrial areas, these trays may only last 1 to 2 years. Our durable, high-quality trays come in various sizes and styles to fit any project, big or small. It is relatively affordable, especially when considering its durability and long lifespan. Wire mesh is generally easy to install and can be. Unknown: Creation of dynamic property Language::: \$config is deprecated in /home/networ32/unimaxcatalog.phpon line 9Unknown: Creation.
