

Case Study of Edge Data Center Construction in Australia

Overview

A new Queensland-based Edge data center firm is planning to build six data centers across the state in Australia. Utilising EcoStruxure™ IT, LEDC monitors all facilities in real time, remotely, ensuring uptime across their network of connected Tier 3 data centres. Providing Private Cloud Infrastructure, Backup and Storage Services to Regional Australia. Click Learn More to View the Case Study. Since launching its state-of-the-art data centre in Dubbo in 2021, LEDC has been a game-changer. Many challenges for regional businesses are now a thing of the past thanks to Leading Edge Data Centres (LEDC). Macquarie Data Centres has implemented a one-off design and multiphase expansion strategy to enhance flexibility.

Case Study of Edge Data Center Construction in Australia

With rapidly increasing data storage demand in Australia, NEXTDC engaged Aurecon to engineer an expansion to the original M2. Challenged to make the facility operational as soon as possible, ...

Our study defines the Australia data center construction market as every green-field or brown-field project that delivers the physical shell plus its critical electrical, mechanical, and general ...

Bringing internet & cloud solutions by building highly connected edge data centres across regional Australia. Call (02) 8073 9777 today.
