

Central Asian countries network security equipment 1G

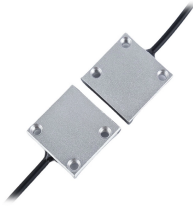

Overview

This report assesses the current security environment in Central Asia, highlighting emergent threats and critical areas requiring regional cooperation. Therefore, having a robust regional cybersecurity strategy is essential for ASEAN Member States (AMS) to ensure the continued security and stability of our cyberspace. INTERPOL extends a range of tools, platforms, and operational support, all aimed at enhancing cross-border police cooperation for a safer world. The report describes a clear shift away from individually procured infrastructure toward large, continuously refreshed networks of compromised SOHO. A Caspian Policy Center (CPC) webinar on September 16, "Central Asia and the Digital Silk Road: Implications of Foreign Surveillance Systems in Central Asia," discussed the CPC's newly released policy brief, "China's Growing Influence in Central Asia through Surveillance Systems. The experience of China, Singapore, South Korea, and Taiwan shows that effective implementation of digital. The ASEAN region is a prime target for cyberattacks The digital economy in the Association of Southeast Asian Nations (ASEAN)1has the potential to add \$1 trillion to GDP over the next 10 years. However, cyber risks could impede trust and resilience in the digital

economy and prevent the region.
