

Circular light sensor module

Circular light sensor module

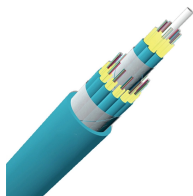

Need an LED module for indoor, outdoor or industrial lighting? Start by application and follow practical guidance to narrow your options.

Osram LEDVANCE Surface Circular 250 SENSOR, 13W, 3000K warm white, 920lm, White body, IP44, 250mm dia, with integral movement and daylight sensor (microwave MWS), 4058075110168

Our fingerprint recognition module is equipped with a high-performance ...

Our fingerprint recognition module is equipped with a high-performance acquisition chip, featuring an advanced algorithm and a circular acquisition chip with a 192x192 pixel sensor. The integration of ...

As the sensor of the concerned product is a motion sensor and a light sensor integrated into one sensor, the energy saving coefficient is 0.55.

Professional Performance: This fingerprint sensor integrates image acquisition and algorithm chip in one, with professional performance. You can use it with confidence. Sensitive Recognition: This ...

It is hard to get more size for larger ceiling light. But we can design the circular led module as some same parts, which will be easy for PCB production and assembly.

Three color temperatures adjustable at will, widely applicable; 5.8G radar sensing, strong anti-interference, high stability.

Circular modules from Tridonic · Modules CLE · For ceiling-mounted and wall-mounted luminaires · Long lifetime » Find circular modules now!

Circular LED modules for use in Class 2 lighting systems. UL recognized components with highly reflective white soldermask, thermally conductive metal core PCB and 4-step MacAdam color binning.
