

Compatible Anti-tracking DFB Distributed Feedback Laser

Compatible Anti-tracking DFB Distributed Feedback Laser

With versatile, hermetically sealed packages like HHL, TO-can, and fiber-coupled options, our customizable DFB laser diodes ensure precise spectral control and reliable integration into advanced ...

The front facet of the laser chip is provided with a high quality antireflection coating for avoiding the Fabry Perot modes of the laser chip. Distributed Feedback (DFB) Diode Lasers are available at ...

Narrow down on the list of Distributed Feedback (DFB) Laser Diodes by wavelength, type, technology and other parameters. Once you find a list of relevant products download datasheets and request ...

Search for and compare optical components from manufacturers around the world, or for custom jobs we'll match you with an industry expert service provider.

Distributed Feedback Lasers (DFB) from Innolume ensure high wavelength stability and narrow linewidth. Covering 780-1350 nm, they feature a proprietary chip design.

The acronym DFB laser stands for distributed feedback laser. Their key features relative to other semiconductor lasers are their single longitudinal mode (single frequency) emission profile, ...

These DFB lasers are housed in a compact, pigtailed, TO can package with a D-pin code. Thorlabs also offers a compatible mount with an integrated thermistor and TEC (Item # LDM9LP), which provides ...

Offers high-quality DFB lasers (1018-1188 nm) for diverse applications. Our lasers support a wide range of operations from picosecond (15, 20 or 50 ps) to nanosecond pulses and CW, ideal for material ...

This page describes our DFB-LD (Distributed Feedback Laser Diode) products suitable for applications such as fiber sensing, 3D sensing, and gas sensing.

This distributed feedback lasers buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.
