

Construction of China Unicom Optical Cable

Overview

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will span from Hong Kong to Sihanoukville in southern Cambodia. The project involves principles of moderate advancement, scientific planning, and coordinated development. It accelerates the construction of network infrastructure and actively plans computing power, enhanced the breadth and depth of mobile network coverage and user perception. Broadband network capability continues 5G. Recently, the first new global carrier "Large Effective Area Fiber" (LEAF) (ITU-T standard code G. This project represents Cambodia's inaugural. Posted by Cable Technology News Team | Nov 20, 2025 | Sponsor Features, Editor's Desk, Wire & Cable, Fibre Optic Hengtong, in collaboration with China Unicom, has successfully deployed and begun operating China Unicom's first commercial hollow-core fibre optic cable line. E-blown microduct cable backbone project in Gansu province.

Construction of China Unicom Optical Cable

China Unicom continues to advance the construction of a government-enterprise network offering ultra-wide coverage, ultra-large bandwidth, ultra-low latency, and ultra-high reliability for an intelligent ...

Recently, Yangtze Optical Fibre and Cable Joint Stock Limited Company (YOFC, stock code: 601869.SH, 06869.HK), in collaboration with China Mobile and China Telecom, established the ...

Recently, Hengtong Optic-Electric and China Unicom launched the construction of China's first long-distance, ultra-low-loss G.654.E blown microduct cable backbone project in Gansu...

This hollow-core fibre cable is now serving a dedicated line for a bank branch in Jiangsu, where it has been integrated into the live network. To verify stable operation, two test services were ...

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will ...

This marks a significant breakthrough for China Unicom in the innovation of cutting-edge optical communication technology and the construction of next-generation communication infrastructure.

SINGAPORE, April 6 (Reuters) - Chinese state-owned telecom firms are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle East and Europe to...

China Unicom is a major client of the Group, and this centralised procurement plays an active role in pushing forward with the 5G infrastructure scale and deployment. The publicity period of the Notice, ...

In 2014, China Unicom took the lead in launching the exploration of new types of optical fibre in the global industry, and promoted and participated in setting the ITU-T G.654E optical cable ...

Chinese state-owned telecom firms, China Telecom, China Mobile, and China Unicom, are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle...
