

Customized Double-Row Cooling Aisle Cabinet Brands

Overview

DAMAC's engineers collaborate with you to design a custom build or recommend one of our turnkey, design-built solutions for hot or cold aisle containment. Our aisle containment systems are designed to optimize energy use and enhance airflow management in data centers, both new and existing. Built for secure data environments, telecom spaces, industrial facilities, and organizations requiring controlled emissions.

Customized Double-Row Cooling Aisle Cabinet Brands

Upsite AisleLok containment solutions and portfolio of aisle airflow management products are designed to improve cooling effectiveness and efficiency by enhancing airflow management.

Built for industrial equipment frames, electronics enclosures, prototypes, test fixtures, and applications requiring field customization and strong structural assemblies. Delivers controlled airflow, prevents ...

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...

Aisle containment is a data center thermal management solution designed to improve server cabinet cooling efficiency at the row level. It involves installing physical barriers to “contain” the aisle between ...

Whether ceiling hung or integrated with aisle structure, our containment solutions are manufactured on our dedicated lines for quality, accountability, and fast lead-times.

We can custom design solutions to fit any site situation and, of course, not only provide the best possible solution, but you'll get it fast and without the "premium" costs.

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.
