

DIY Optical Cable Traction

DIY Optical Cable Traction

I made a bunch of cables, they have done hundreds of dives and work like a charm. One of the really neat things about DIY cables is that you can have any length you want - including ...

Fiber optic cable may be installed indoors or outdoors using several different installation processes. Outdoor cable may be direct buried, pulled or blown into conduit or innerduct, or installed aurally ...

The bending radius of optical cable during laying process should be effectively guaranteed to avoid “gold hooks” and avoid too much tension, abrasion and too many times of twists and turns.

A certain amount of plastic pipes can also be pre-laid in the building, and the optical cable can be laid by traction or vacuum method when the optical cable is to be laid later.

0 I have fiber optic cable (white plastic, about 1mm in diameter) running into my unit, installed by the provider. This terminated in a reel of cable (about an extra 30m). I decided to move ...

Many people are confused about the hanging of aerial optical cables. In fact, there are two methods for aerial optical cables laying: one is “fixed-pulley traction method”, including “manual ...

Check out this amazing video of our team pulling and installing overhead optical cables!

Une traction sur la boucle fermée entraîne la traction du câble par l'intermédiaire de sa gaine, au niveau du point de fixation du fil. Un tel système est toutefois perfectible en termes de...

These are the way to get started. Should you use fiber optics for your communications system? What are its advantages and disadvantages? Isn't fiber optics still too new for everybody to adopt it? Is it ...

In the spirit of self-reliance and technical mastery, we've crafted this detailed guide to empower you to take control of your own network by installing fiber optic cables yourself. This comprehensive guide ...
