

Distance between the distribution box and the first-level construction engineer exam

Overview

What should the distance be between the floor and the distribution board or main switch?

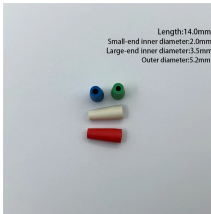

Approved Document M of the Building Regulations states that consumer units/fuseboxes should be mounted so that the switches are 1350-1450mm above floor level. It is designed for recent graduates and students who are close to finishing an undergraduate engineering degree from an EAC/ABET-accredited program. The FE exam is a computer-based exam. You may use a calculator during the exam. Reviewing it before exam day will help you become familiar with the charts, formulas, tables, and other reference information provided. You won't be allowed to bring your personal copy of the Handbook into the exam room. Electrical room location and cable entry approval to be shown as Per MEPS/LDN approval. Working space: The front clearance, side clearance, and height clearance requirements for electrical equipment that provide a safe area for maintenance, inspections, and other work.
