

## Does Honduras use fiber optic cables for communication

### Overview

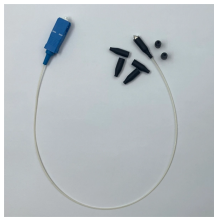

Honduras gets its internet from two commercial fiber cables bringing in internet from Florida to Omoa. One is Maya 1, owned by Telefónica, laid in 2000, and the other is Arcos, owned by Liberty Cable, laid in 2001. Honduras is among the poorest countries in Central America and has long been plagued by an unstable political framework which has rendered telecom sector reform difficult; this has created real difficulties for telcos as well as consumers; fixed-line teledensity, at only 4.9%, is significantly below the regional average. Telecommunication systems: general assessment: among the poorest countries in Central America, Honduras has a neglected telecom sector complicated by political stalemate and geographic challenges; mobile subscribership is growing; DSL and cable Internet available in urban areas but expensive;. The Americas Region Caribbean Ring System (ARCOS-1) is a fiber optic submarine communications cable of 8,400 kilometers that extends between the United States, the Bahamas, the Turks and Caicos Islands, the Dominican Republic, Puerto Rico, Curaçao, Venezuela, Colombia, Panama, Costa Rica. The Submarine Cable Map is a free and regularly updated resource from TeleGeography. People working remotely have taken notice and a growing number are leaving US and

Canada behind and moving to Roatan. The Bay Island's internet dates back.  
Key Insight: Honduras has seen significant growth in fiber optic infrastructure, reaching 45% coverage by 2026.

## Does Honduras use fiber optic cables for communication

This interconnection is also accomplished through three different routes, two fiber optics (one grounded, the other aerial) and one microwave. Once again an effort is made to guarantee the quality of the ...
