

# Electrical distribution boxes are equipped with warning signs

## Overview

Safety labels on breaker panels are imperative for warning workers, preventing accidents, and responding to emergencies. In the midst of a malfunction, a well-labeled electrical panel becomes a lifesaver. Such locks or preventive devices shall be removed only by the persons who installed them or by authorized personnel. Power circuits shall be. Unusual sounds coming from the panel box itself should also prompt immediate concern. Hearing persistent buzzing, crackling, popping, or sizzling noises indicates loose wiring connections or active electrical arcing inside the panel. This makes fixing problems faster and keeps you safe. The Ontario Electrical Safety Code (OESC) also requires high voltage systems with the possibility of feedback to have updated single-line diagrams — both at the time of installation and after any modifications ( labelling directly impacts safety. 305 (b) (3) (iii) Covers for boxes shall be permanently marked “HIGH VOLTAGE.
