

Fiber optic router can be used even when it s not turned on

Overview

Because fiber lines don't carry electricity, your ONT (Optical Network Terminal), router, and WiFi equipment need to be powered. Many people have used cable or DSL internet in the past, so they are used to having a modem. Your router and ONT (the fiber version of a modem) are plugged into an electrical outlet in your wall. Think of your ONT as the. At home, a disruption in the power supply used to mean lighting candles (no longer recommended due to the risk of fire), turning on flashlights, opening or closing windows and waiting it out. In our interconnected world, however, we demand more than light.
