

Fiber optic sensor display Locon

Fiber optic sensor display Locon

The company's product line includes photoelectric sensors, inductive proximity sensors, connecting cables, fiber optic cables, and capacitive switches. These products are used in applications that ...

The high quality product that Locon provides is readily matched to harsh application conditions, making our fiber-optic and photoelectric sensor pairings suitable for a variety of tasks - they are a successful ...

1075KWHH ESS

Fiber optic cables can be partnered with the photoelectrics to accommodate high temperature environments, or sensing in small spaces. Notably, we also customize sensors to suit the individual ...

Shop a variety of high quality Photoelectric, Inductive and Capacitive sensors at Locon Sensor Systems. We also offer cables and connectors! Order here!

Find Locon Sensor Systems, Inc. Photoelectric Sensors Data Sheets on GlobalSpec.

This allows the sensor to supply the correct logical signal (normally open or normally closed) depending on the application. Each universal sensor has an PNP and an NPN output.

Find Locon Sensor Systems, Inc. Fiber Optic Proximity Sensors Data Sheets on GlobalSpec.

Analog Inductive Proximity Sensors LOCON your reliable choice for high quality inductive sensors With short circuit and overload protections built in, these sensors are built to last. With additional load...
