

Gigabit and 10 Gigabit pigtails

Overview

Factory terminated pigtails can easily be fusion or mechanically spliced to an existing fiber line. Custom lengths, connector combinations and polishes are. Gigabit Ethernet (1 Gbps) and 10 Gigabit Ethernet (10 Gbps) standards have a different pinout when compared with Ethernet (10 Mbps) and FastEthernet (100 Mbps) standards. It was first defined by the IEEE 802. Unlike previous Ethernet standards, 10GbE defines only full-duplex. The Belden CA31308100 PIGTAIL-B 10GX CMR GRY 100 is designed to provide dependable network connectivity. Featuring an Unshielded Twisted Pair (UTP) design, it offers improved usability and efficiency. Patch cords support network applications in main, horizontal and equipment distribution areas and are available in riser (OFNR), and low smoke zero halogen (LSZH) rated jacket with maximum 5dB loss.
