

Gyta-2 fiber optic cable

Gyta-2 fiber optic cable

The GYTA single-armored cables feature stranded loose tube filled with a water-resistant filling compound. A steel wire, sometimes sheathed with polyethylene (PE) for cables with high fiber count, ...

GYTA is an outdoor use optical fiber cable suitable for duct and aerial applications. We supply GYTA fiber optic cable from 2 fiber cores to 288 fiber cores. Both ...

GYTA is a type of fiber optic cable in stranded loose tube fiber optic cable with compact structure, and the cable jacket is made of strong Polyethylene. High strength loose tube has hydrolysis resistant.

GYTA cables feature a robust loose tube design that withstands harsh environmental conditions, ensuring long-term reliability. The specialized oil-based filling effectively protects the fibers from ...

The structure of GYTA optical cable is that single-mode or multi-mode optical fiber is sheathed in a loose tube made of high modulus polyester material, and the tube is filled with waterproof compound.

In this article, we will explore the applications, advantages, installation procedures, and future trends of GYTS/GYTA cables. By delving into these aspects, we aim to provide a comprehensive ...

Featuring a multi-loose-tube stranded structure, the cable offers excellent mechanical strength, enhanced water blocking, and reliable performance in harsh outdoor environments.

Application GYTA has a very good watertight performance. This cable can be used for LAN and WAN backbones, telecom access lines, fibre to business and fibre to the building drop connections, as well ...

GYTA is with high strength loose tube that is hydrolysis resistant and the optical cable filling materials ensure high reliability, its APL makes the cable crush resistant and moisture proof. The GYTA is ...

High Capacity: The GYTA cable can support up to 576 cores, making it one of the most powerful fiber optic cables on the market. This makes it an ideal choice for large-scale ...
