

HP Fibre Channel Switch Traffic

Overview

The switch offers full non-blocking 16-Gbps Fibre Channel performance on 48 line-rate ports and an aggregate bandwidth of 768 Gbps in each direction in a 1 Rack unit form factor. Connect as little as 2 devices or scale up to 20 Fibre Channel devices with a single switch. The HP 8/20q also supports legacy 4Gb and 2Gb Fibre. HP offers multiple FCoE solutions, from fabric-edge solutions using FCoE CNAs and CN switches integrated with existing FC target environments, to full FCoE end-to-end solutions using CNAs, CN switches and FCoE storage targets. Main sections of this guide include: The HPE Storage Fibre Channel.
