

How to buy earthquake-resistant cable tray supports

How to buy earthquake-resistant cable tray supports

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.

Seismic bracing, typically made of high-strength metal, is key component specifically designed to enhance the stability and safety of cable tray systems during earthquakes.

Shop Earthquake Bracing at Launch 3 Telecom, seismic support solutions designed to secure cable trays, conduit, and equipment during seismic events.

Welcome to Chatsworth Products Website | Chatsworth Products

EAE Seismic Support Systems offer rigid solutions for installations that require earthquake protection. The seismic supports, which can be utilized in any type of installation, allows for quick and easy ...

This article discusses the importance of seismic resistance for cable trays, detailing when seismic braces are necessary, the factors that affect seismic resistance, and how to ensure your ...

OM1 Fiber Patch Cable Family

Connect cables directly to 3/8" threaded rod in trapeze installations for seismic bracing. Use 2 EZ BN 3/8 to attach cables to FAS PCH for sway bracing. Predrilled tabs allow attachment directly to concrete ...

Our team of experts can help you select the best cable tray series for your application, as well as designing your seismic bracing layout to ensure it meets applicable building codes and standards.

Length:17.1mm
Small-end inner diameter:1.2mm
Large-end inner diameter:3.5mm
Outer diameter:5.5mm

This bracing kit is used to prevent damage to cable tray sections during earthquakes.

Selecting the right earthquake resistant cable tray is critical for safety and compliance. A methodical evaluation ensures your system can withstand seismic events.
