

## How to connect a four-core multimode fiber optic cable

### Overview

Connecting a 4-core fiber drop cable to link two different networks requires proper planning, the right tools, and precise termination techniques. It is possible to connect the two different cable types; however, a media converter must be used to adapt the core sizes and optical. This Video is about user side splicing for LCAPC and SPAPC both in MODF ( Micro ODF). in this video we will learn how to splice 4 core with Fujikura Splice machine S60. The wider core accepts light from. OM4 patch cables stand at the forefront of high-speed connectivity, embodying versatility and resilience precisely when speed and reliability are paramount in our digital age. In. Summary : Define the route, select the appropriate type of fiber (single-mode or multimode) following the standards that may apply such as TIA/EIA or NEC.
