

How to wind optical cables onto a reel

How to wind optical cables onto a reel

If necessary, adjust the spring tension on the reel by adding or removing wraps of electrical cord from the spool, one wrap at a time, until the desired tension is obtained.

21 Fibre optic cable reels Fibre optic cable reels with different barrel diameters and winding widths. The barrel is coated with PE foam

The Optical Fiber Winder Cable Take up Machine is a device that uses a servo control system and is driven by a high-precision servo motor to neatly wind the fiber optic cable into a reel. Its core function ...

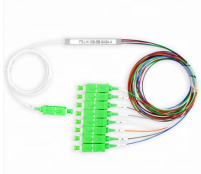

The golden rule is to always unspool the cable from the reel. Never lay the spool on its side and pull the cable off over the flange, a method known as "spinning off."

#diy #tootips #windup this was a game changer, never even noticed the pop out knob on the side of the reel make...more

	<p>Showmark is a leading manufacturer of respoolers and winders for use with optical fiber, cable and other fine filaments.</p>
-----------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------

	<p>Move the working reel toward the free end while winding all cable onto the reel. This will allow cable twists to roll toward the free end and be relieved during this procedure.</p>
-----------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>4. If cable stop was not factory installed, rotate spool counter- clockwise (viewed from slip ring side) until all cable is wound on spool, not extending through cable guide (Fig. 1.)</p>
