

Huawei S3300 Switch with 48 Fiber Ports

Overview

Huawei S3300 Series Switch S3352P-EI-48S Mainframe with 48 100 BASE-X ports, 2 100/1000 SFP ports, and 2 SFP ports. Features DC -48V power, 13.2 Mpps forwarding. S3300 switches (S3300 for short) are next-generation Layer-3 100-megabit Ethernet switches developed by Huawei to carry various services on Ethernets, which provide powerful Ethernet functions for carriers and enterprise customers. Based on the new generation high-performance hardware and Huawei Versatile Routing. Switching capacity: 17. The S3300 series consists of S3326, S3328, S3352 models. It supports DC -48V, making it ideal for deployment in various.

This switch is equipped with 48 100 BASE-X ports, 2 100/1000 BASE-X ports, and 2 SFP GE (1000 BASE-X) ports. It supports DC -48V, making it ideal for deployment in various business environments.

The S3300 can be used as access devices in buildings or applied to the access layer and aggregation layer of campus networks. The S3300 is easy to install. It supports automatic configuration and plug ...

This switch is equipped with 48 100 BASE-X ports, 2 100/1000 BASE-X ports, and ...

Huawei's S3300 series comprises Layer 3 Fast Ethernet switches for service providers and enterprises. Key models (e.g., S3328, S3352) are 1U devices in Standard (SI) and Enhanced (EI) versions, ...

This series can support up to 48 100Base-FX SFP, two 100/1000Base-X SFP and two 1000Base-X SFP. Furthermore, the S3300 series delivers fan-free design, flexible QinQ function and other enhanced ...

The S3300 can be used as an access device in a building or a convergence and access device on a Metro network. The S3300 supports easy installation, automatic configuration, and plug-and-play, ...
