

Imported optical amplifier PAM4

Overview

It is spaced 250um anode to anode, to be compatible with standard optical interfaces. Features include RSSI for photo-alignment and power monitoring, and I2C control of bandwidth, output amplitude, peaking, LOS, gain and other parameters. In this example, we use INTERCONNECT solutions to study the 4-Pulse Amplitude Modulation (PAM) format. The simulation can be set up from a new simulation, starting at. The MATA-40754 Quad Linear TIA supports high bandwidth optical data links. Since PAM4 signal do not return-to-zero after each symbol, they are also an NRZ signaling scheme. The MATA-39434A consumes very low power. Ara features eight 200Gbps/channel PAM4 host electrical interfaces, and an octal 200Gbps/lane PAM4 optical interface with integrated high-swing laser-modulator.
