

Innovative Design Solution for Fiber Optic Distribution Frames

Overview

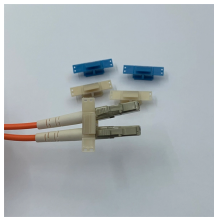

Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. Fiber distribution hardware manages each fiber and connection point that is associated with active electronics. Why do operators, designers, and installers use additional fiber optic hardware racks for cable and fiber management?

The active electronics are the most expensive part of the. Network managers need a better solution, one that supports rapid deployment, plug-and-play connectivity and high density—all while maximizing the usable density and long-term value of the fiber network. In this article, we will delve into various optical distribution frame.
