

Installation of Non-standard Explosion-proof Distribution Boxes

Overview

When installing and wiring an explosion-proof distribution box, it is essential to follow strict safety protocols and national electrical standards (e., IEC, NEC, or local safety regulations). Combustible dust, volatile gases, and chemical. When installing, please follow the instructions strictly and ensure installation by a professional. Open the terminal chamber cover, connect the cables through the cable gland to the terminals, ensuring both the internal and external ground wires are correctly connected. These places are more prone to protection accidents. All accessories, spare parts, and components must be.
