

Installation of fiber optic cable and utility pole guy wire

Overview

Example: A 288-fiber ADSS cable on 50m poles requires 7/2. 2mm galvanized steel messenger wire (tensile strength $\geq 41,000\text{N}$). Anchoring: Use concrete dead-end poles. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both. Aerial installation is generally much less costly than underground construction also. Understanding Overhead Fiber Optic Cable Overhead fiber optic.
