

Integrated Relay Protection Tester System

Integrated Relay Protection Tester System

Solutions for Power Industry Testing Protection Relay Test Wide range of solutions for secondary injection testing, protection relay testing and IEC61850 testing in digital substations.

MTS-5100 is an all-in-one protective relay test system with a direct front panel interface, designed for testing and calibration of protection and control relays.

Compact, high-power relay test systems with IEC 61850 protection test capabilities and advanced touch interface. A software dedicated for commissioning and maintenance in digital substations. RTMS ...

Mesh door/glass door optional

Sp-601 glass door Sp-602 mesh door

The MTS-5100 is the most powerful all-in-one relay test system with a direct front panel interface for all functions, without exception! The ideal system for testing and calibrating protective relays using ...

The robust and universal solution for testing protection relays. Packed in a handy, extremely robust and resistant hard shell case, the versatile test system is also ideally suited for challenging outdoor use, ...

The ideal integrated system for testing and calibration of protection and control relays, simulation of power system phenomena, and verification of voltage, current, phase, and power ...

The SEL-4000 Relay Test System is designed for testing protective relays that have low-level test capabilities. The system consists of the SEL-AMS Adaptive Multichannel Source and either the SEL ...

Hence a comprehensive testing of protection relays is very important in order to keep the power system stable and working properly. EMC PARTNER offers a complete and extensive test solutions from ...
