

Is the internet connection via fiber optic cable or a router

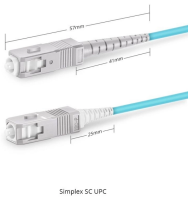

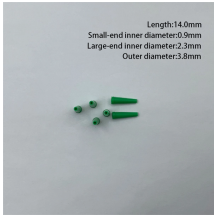

Overview

Instead of a traditional modem, fiber internet requires an Optical Network Terminal (ONT) that converts light signals into electrical signals your devices can understand. The ONT is linked to your router or gateway using an Ethernet cable. The technician powers, tests, and activates the connection to confirm full speed and signal quality. Most fiber ISPs. Fiber internet eliminates the need for a traditional modem.

Is the internet connection via fiber optic cable or a router
