

Is the router using fiber optic or broadband

Overview

A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. Fiber routers are able to handle higher bandwidth demands and offer lower. This guide will walk you through everything you need to know, from decoding tech specs to matching features to your lifestyle, so you can confidently choose the perfect fiber optic router for home and unleash the full potential of your internet. The fundamental distinction between fiber and cable internet lies in how data travels to your home.

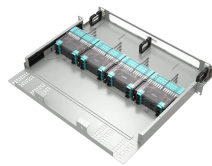

Is the router using fiber optic or broadband
