

Israel Cable Tray Production Line

Overview

Our advanced cable tray production line is engineered to provide automated forming, punching, and cutting processes for various types of cable trays, including perforated, ladder, and solid-bottom trays. With high precision, fast production speed, and stable performance, it helps manufacturers. Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray to length. 35 USD Million by 2032 and is projected to grow at a CAGR of 6.
