

## Laser Diode Leads

## Laser Diode Leads

Laser diodes (LD) are semiconductor devices that convert electrical energy into high-power optical energy. These devices are currently used in the fields of telecommunications and ...

Unlike a regular diode, the goal for a laser diode is to recombine all carriers in the I region, and produce light. Thus, laser diodes are fabricated using direct band-gap semiconductors.

Laser diodes are available at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many laser diode manufacturers including ams Osram, KYOCERA AVX, ...

Check each product page for other buying options. Price and other details may vary based on product size and color. Need help?

Shop DigiKey's large in-stock selection of Laser Diodes, Modules. View inventory, pricing and order now for same day shipping!

These modules offer single-spatial-mode output in compact, electrically isolated cylindrical housings and are ideal for use as alignment lasers in optical systems. As these diodes are not thermally stabilized, ...

We try to help our community of laser scientists & engineers find the best products for their projects by hosting a free Open-Index product database with lasers from all manufacturers.

Here you will quickly and easily locate a laser diode to meet your specifications. Enter the desired parameters and you will immediately receive an overview of compatible laser diodes from our ...

Laser Diode 30Pcs 5V 650nm 5mW Mini Red Dot Laser Head, 6mm Outer Diameter Laser Module with Leads, for Arduino Laser DIY Electronics Projects, High-Stability Red Laser Diode

We offer laser diodes with different output characteristics (power, wavelength, beam size, shape, etc.). Most lasers offered here are single transverse mode (single mode, or SM) and a few are designed ...

## Contact Us
