

Latest Silicon Photonics Technology

Overview

The new silicon-photonics architecture improves lidar scanning performance without adding bulky mechanical components. One standout material is lithium niobate (LiNbO_3), renowned for its high electro-optic coefficient, making it an excellent fit for high-speed optical communication systems. Images for download on the MIT News office website are made available to non-commercial entities, press and the general public under a Creative Commons Attribution. Uncover the latest and most impactful research in Silicon Photonics. Explore pioneering discoveries, insightful ideas and new methods from leading researchers in the field. Read stories and opinions from top researchers in our research. Yole Group unveils its latest photonic market and technology analyses, Silicon Photonics 2025 and Co-Packaged Optics for Data Centers 2025, which explore how AI-driven demand is reshaping connectivity, from transceivers to packaging innovation. 200G/channel will become the new mainstream, enabling. Promoted ProductFast, Precise Focus for Microscopy High-speed Z-axis positioning is critical in advanced microscopy. The Queensgate OP series of piezo objective positioners delivers nanometer precision and closed-loop stability for confocal, super. Promoted

ProductGEV-Thunderbolt Frame.

Latest Silicon Photonics Technology

MIT researchers developed a silicon-photonics lidar chip that widens scanning angles while reducing signal noise.

The heterogeneous integration of new materials onto silicon photonics platforms will enable next-gen electro-optical modulators and detectors for such short-reach and short-haul ...

All the latest silicon photonics news, videos, and more from the world's leading engineering magazine.

We chart the generational trends in silicon photonics technology, drawing parallels from the generational definitions of CMOS technology. We identify the crucial challenges that must be...

Photonics is the science and technology of generating, controlling, and detecting photons—particles of light. It underpins a wide range of modern technologies, from fiber-optic communications and lasers ...

MIT researchers demonstrated an advanced silicon-photonics chip-based system that could enable compact, durable, solid-state, high-performance lidar sensors for autonomous vehicles ...

Photonics Spectra is a global photonics resource and magazine with news, products, research, and applications covering optics, lasers, imaging, and sensing.

Yole Group unveils its latest photonic market and technology analyses, Silicon Photonics 2025 and Co-Packaged Optics for Data Centers 2025, which explore how AI-driven demand is ...

“Following the announcement of its new silicon photonics technology in February 2025, ST is now entering high-volume production for leading hyperscalers.

Uncover the latest and most impactful research in Silicon Photonics. Explore pioneering discoveries, insightful ideas and new methods from leading researchers in the field.
