

Low-loss installation solution for micro-modules in Malaysia

Overview

Based in Malaysia, we specialize in integrating complex electromechanical components—including PCBs, cable harnesses, connectors, housings, and control units—into ready-to-install modules. Micro Modular System, a leading industrial automation machine and equipment manufacturer was incorporated in 1997 in Malaysia. Surface and Flush Plastic enclosures Easy9 enclosures are designed for installing modular devices in residential and small building environments. They are used indoors and are available in 8, 12, 18, 24 and 36 modules of 18 mm. Over the years as an automation machine manufacturer, MMS has provided automation solutions to many well-known. High performance materials, careful attention to design detail, and stringent process control yields: Ultra low insertion loss over the specified frequency range Excellent amplitude stability with flexure Stable performance over operating temperature range Increased shielding effectiveness Greater. With miniature drylin linear modules, igus offers a wide range of products with extremely small, especially light and quiet linear modules and linear axes.

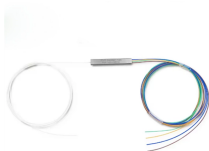

Low-loss installation solution for micro-modules in Malaysia

Established in 1997, Micro Modular System (MMS) is an automation company based in Penang, Malaysia, operating from a modern facility spanning 90,000 square feet with over 120 ...

Microdian Sdn Bhd, Malaysia's trusted RF & Microwave solutions provider since 2005. We specialize in RF cable assemblies, microwave passive components & test equipment, delivering complete ...

Based in Malaysia, we specialize in integrating complex electromechanical components—including PCBs, cable harnesses, connectors, housings, and control units—into ready-to-install modules.

Weatherproof enclosures Suitable for 3 to 72 modules, the waterproof enclosures provide complete protection to everything from industrial sockets to command modular devices and beyond. Simple to ...

To provide an ideal solution for most application areas, igus offers miniature linear modules with lead screw drive or toothed belt drive. Here, the drives can be carried out both manually and with a motor.

Malaysia's reputable automation enterprise. Micro Modular creates and manufactures unique solutions to increase your productivity. Request a free quotation!

Located in the Free Industrial Zone of Penang, Malaysia, MMS provides customised testing solutions for smart devices, semiconductors and LED-affiliated industries.

Trim and form solutions from Micro Modular System have a reputation for innovation, quality, and dependability at a low cost of ownership. Each system has been built to suit the ever-increasing ...

We provide automated LED-test solutions that are tailored to customers' needs. Our AOI machine is capable to inspect LED chip, wafer chip, IR sensor, laser diode etc. with stringent inspection ...

Morse Micro-powered solutions empower smart homes, smart cities, infrastructure, industrial, and enterprise applications, providing 10 times the range, 100 times the area, and 1,000 times the volume ...
