

M708 small busbar

M708 small busbar

Easy to install directly to battery terminal. Tin Plated Copper battery terminal mount busbar. Insert-molded stainless steel stud eliminates need for securing nut and allows high torqueing for excellent ...

Altech has added a new line of UL489 Busbars to its product range with ratings of up to 115A. They are UL recognized for use with most of Altech's competitor's UL489 Miniature Circuit Breakers. Altech's ...

SonicFlexBus provides a flexible space-saving profile, using flat conductors stacked between two layers of film dielectric. The sonically welded outer edges enable the flat conductors to slide freely within the ...

Lightweight, easy to machine, and corrosion resistant—all with material certificates for traceability. Choose from our selection of bus bars, including over 650 products in a wide range of styles and ...

A copper bus bar delivers higher conductivity, enabling a smaller cross-section for the same current and excellent contact performance with predictable temperature rise.

ROLINX busbars are constructed and manufactured laminated busbars that meet the strictest requirements for railway drive converters, network, wind and solar converters, as well as drives for ...

Discover our automotive busbars and terminal blocks to consolidate wiring and distribute power in a cost-effective manner. Screw and stud terminals available.

Price and other details may vary based on product size and color. Need help?

Electro Tin Plated Copper Bus Bar, 100/300 micro inches of plating. The thin tin coating acts as a shield, inhibiting copper oxidization. Copper oxidization causes poor electrical contact which then gets hot ...

Busbars are metal bars that can be composed of numerous alloys but are most commonly copper or aluminum. Typical busbar applications include switchgear, panel boards, power invertors, powered ...
