

Method for disconnecting wires from high-voltage distribution boxes

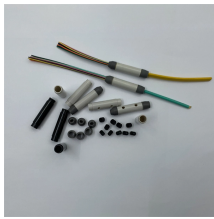

Overview

All wiring contained in conduit and trunking will be manually pulled by means of approved pulling material such as nylon cord and pull spring so that cable will not be damaged. Electricity transmission networks consist of high-voltage transmission lines that interconnect various regions and demand centers. In some areas, individual utilities operate their own transmission networks. In other parts of the country, coordination, control, and monitoring of single-state or. All electrical equipment, materials, devices, appliances, and fittings must be listed and labeled for it's intended use, and installed according to this code and where not specific, to the Oregon Electrical Specialty Code. For the purposes of inspection, all electrical connections must be. Working on or near exposed energized parts. General - Qualified employees only.
