

Multi-connection distribution network automation

Multi-connection distribution network automation

With DA communications leveraging intelligent connectivity from Itron, you can plan and operate distribution systems to maintain voltage across the network and reroute power in case of disruptions.

In the context of smart grid deployments today, DA refers to an intelligent distribution system that uses a network of sensors and controls that provide greater reliability, flexibility, and agility.

Cisco's Distribution Automation solution uses advanced key generation and exchange mechanisms for both link layer and network layer encryptions, simplifying key management and ...

The multi-purpose Gridstream Connect communications network enables distribution utilities to deliver higher reliability, better customer service, and reduced operating costs while maintaining workforce ...

Improve the reliability and availability of power distribution grids. Siemens Distribution Automation functionality ranges from monitoring to fully automated applications, including FLISR (fault location, ...

This Distribution Automation (DA) architecture is a fundamental part of any Cisco network, providing enhanced, end-to-end security from the control center all the way to the edge of the distribution network.

Offering increased security, simplified installation, reduced training and lower cost of ownership, the highly flexible control can be readily deployed in advanced automation schemes such as Eaton's ...

Automation and control systems necessary to manage distribution networks with high penetrations of DER are a particular focus, along with the controls needed to provide services and ...

In this report, groups of DA functions have been combined into Distribution Automation scenarios, so that the combined capabilities can be assessed. In addition, many of the DA functions must rely on ...

The F60 offers an integrated protection, control, metering and monitoring package that can directly connect into DCS or SCADA monitoring control systems, such as Viewpoint Monitoring.
