I have recently bought a new router (Huawei AX2) and it doesn't have an optical fibre port like my old one. Is there any adaptor I could use and if yes, what is its name?

Because you don't have fiber cables run throughout your house, and you likely don't have a fiber port on your PC. There is no point in the fiber going beyond your ONT.

There is no place in the router to plug it. The Verizon store people say they don't do modems and either use their router or buy a special kind of router that can take the fiber optic cord.

eero 6: The dual-band mesh Wi-Fi 6 system with speeds up to 500 Mbps for every corner of your connected home.
