Overview

The fiber optic contractor should be able to work with the customer in each installation project through six stages: design, installation, testing, troubleshooting, documentation and restoration. Old homes in the United States often hide outdated electrical systems that could pose safety risks. Understanding the types of old house wiring is essential for homeowners to recognize potential hazards. From knob-and-tube wiring to aluminum and cloth-insulated wires, each type has distinct. History of electrical wire & electrical wiring: how to recognize all types of old electrical wiring materials including knob and tube electrical wiring, cables, conductors including unsafe "extension cord" wiring. What do we mean by the "installation process?"

" Assuming the design is completed, we're looking at the process of physically installing and completing the network, turning the design.
