

On-site pricing for fiber optic cable laying

Overview

The cost to install fiber optic cable ranges from \$1.50 to \$42 per foot, with installation costs accounting for 60-80% of total project expenses. According to the Fiber Broadband Association's 2025 report, median costs are \$8 per foot for aerial builds and \$18 per foot for underground projects. The initial cost of installing fiber optic cables can vary depending on the chosen installation method and specific project requirements. Total Project Costs: For commercial installations, expect costs ranging from \$5,000 to \$20,000 per mile for underground projects and from \$40,000 to \$60,000 per mile for aerial projects. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. A short residential drop under 1,000 ft may cost \$3,000-\$8,000, while longer runs to an attached garage or street node can run \$8,000-\$25,000.

On-site pricing for fiber optic cable laying
