

Optical communication bit error rate meter with ± 0.05 dB accuracy three-year warranty

Overview

Dimension Technology's BERT800 bit error tester series offers a comprehensive solution for testing and verifying high-speed optical transceiver modules. These versatile devices can be used in various applications, including mass production, performance verification, and reliability. The OptoBERT family of BERTs offers the best value in the industry for bit-error-ratio testing of optical and electrical components, subsystems and systems. OptoBERT family of products covers data rates from 100 Mb/s to 28. · Use control board and replaceable. Bit Error Ratio Tester is an instrument used to test and analyze bit error ratio in digital transmission systems, fiber optic communication systems, and digital microwave communication systems. In high-speed digital communication systems, even the smallest bit-level error can compromise performance, reduce efficiency, or lead to costly rework.
