

Oz optical attenuator

Oz optical attenuator

Known for delivering high-performance photonics components, the company now offers a comprehensive range of fixed and variable attenuators that support evolving requirements in ...

These results promote the 2- m waveband silicon photonic integration and are expected to the future use of photonic attenuators in crosstalk suppression, optical modulation, and optical...

OZ Optics Ltd. offers MEMS-based variable optical attenuator (VOA) in a fast, low cost miniature package. These best-in-class attenuators are available either as single units or as arrays of ...

In this paper, we propose a 16-channel VOA based on a polymer/silica hybrid waveguide with low power consumption and a broadband property. The VOA unit consists of two broadband ...

The OZ Optics DA-100 Series offers a compact, rugged and low cost digital ...

The OZ Optics DA-100 Series offers a compact, rugged and low cost digital attenuator with high resolution, high speed, high attenuation range and high power handling (blocking technique only). ...

OZ Optics' digital attenuator is a hand held unit, CE approved. These attenuators have low insertion loss, low back-reflection, low PDL and flat wavelength response.

A 24-channel polarization-insensitive variable optical attenuator array is designed and fabricated for ROADM systems. The asymmetric Mach-Zehnder structure is adopted to reduce the ...

OZ Optics offers a broad range of both variable and fixed attenuators having key competitive advantages. All of our attenuators operate over the two standard wavelength bands, the C-Band and ...

This section provides an overview for attenuators as well as their applications and principles. Also, please take a look at the list of 46 attenuator manufacturers and their company rankings.

OZ Optics offers a broad range of both variable and fixed attenuators having key competitive advantages. All of our attenuators operate over the two standard wavelength bands, the C-Band and ...
