

Requirements for wiring harnesses in computer room power distribution boxes

Overview

Article 645 of the 2017 Edition of the National Electrical Code (NEC) covers equipment, power supply wiring, equipment interconnecting wiring, and grounding (bonding) of information technology (IT) equipment and systems in IT equipment rooms. This space is often constructed to meet specific criteria to qualify as an IT room, essentially creating a fire-rated isolation (envelope) from the rest of the building. Many other areas in the NEC apply to these rooms [Sec. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in. 645. These include the following (in. Design requirements for low voltage distribution boxes cover NEC, IEC, and safety standards to ensure reliable, compliant electrical installations.
